

Inmate Header Permissions

ATIMS JMS

Release Version 1.11.3

Business Need

- ❑ ATIMS provides an inmate header throughout the solution whenever an inmate is selected.
- ❑ There are security concerns regarding this data winding up in the wrong users hands.
- ❑ Although the output is very limited, some data like gang affiliation and keep separates should not be common knowledge to all users.
- ❑ There is a need to secure all or a part of the inmate information presented in the inmate header based on user access level.

ATIMS Solution

- ❑ ATIMS added new permission rights to control the access level of the inmate header.
- ❑ For each section in the inmate header ATIMS will provide separate permission rights
- ❑ Configuration upon delivery is very important; these permissions must be assigned to the appropriate user groups.
- ❑ If not assigned, users will see only the name, DOB and inmate number, no other sections of the inmate header will be visible.

Available Inmate Header Permissions

- ❑ JMS-INMATE HEADER OVERALL (permission right 8000)
 - ❑ Overall view of header
- ❑ JMS-INMATE HEADER DETAIL OVERALL (permission rights 8100-8190).
 - ❑ Drill down of Name, FKN, Characteristics, Status, Housing, Location, Classification, Balance, Property, Visitation Schedule respectively
- ❑ JMS-INMATE HEADER PHOTO (permission rights 8200-8210)
 - ❑ Show person photos - front view and other photos
- ❑ JMS-INMATE HEADER ALERT (permission rights 8300-8390)
 - ❑ Text Alerts, Flag alerts, Keep Separates, Associations, Privileges, Observation respectively
- ❑ JMS-INMATE HEADER IN-OUT (permission rights 8400-8420)
 - ❑ Inmate incarceration history

Configuration

- ❑ 'Assign Permission' as needed for each permission.

The screenshot shows the 'ADMIN - Administration Management' interface. The 'PERMISSION ASSIGN TO GROUP' window is open, displaying a tree view of applications and modules on the left, and a table of functionality groups on the right. An orange arrow points to the 'Overall Alert Access' functionality (ID 8300) in the 'FUNCTIONALITY GROUP' table.

<input checked="" type="checkbox"/> MEDICAL STAFF		<input checked="" type="checkbox"/> COMMITMENTS STAFF	

Functionality

- In any module in JMS the system will load the inmate header based on the permissions assigned to his/her user group.

The screenshot displays the JMS - Jail Management System interface. The top navigation bar includes tabs for Intake, Booking, Classify, Records, Property, Facility, Monitor, Programs, Alt Sent, and Medical. Below this, there are sub-tabs for Booking, Release, Supervisor, Active, Search, Housing, Transfer, Appt, Attach, File, and Reports. The main content area is divided into several sections:

- ACTIVE BOOKINGS:** A table listing inmates with columns for Photo, Intake Only, Booking Only, No Classify, No Hous, Name, ID, and DOB. The facility is set to 01-JCDF.
- JMS-INMATE HEADER DETAIL OVERALL:** A red callout box indicating that this section is accessible to users with permission rights 8100-8190.
- JMS-INMATE HEADER PHOTO:** A red callout box indicating that the inmate photo is accessible to users with permission rights 8200-8210.
- JMS-INMATE HEADER ALERT:** A red callout box indicating that the inmate alert is accessible to users with permission rights 8300-8390.
- JMS-INMATE HEADER IN-OUT:** A red callout box indicating that the inmate in-out information is accessible to users with permission rights 8400-8420.
- Inmate Profile:** A detailed view for inmate BRXXMM, HENRY, including fields for NAME, INC, DOB, CHAR, NUM, STATUS OVERALL, STATUS BOOKING, HOUSING, BALANCE, and CLASSIFY.
- Alerts:** A list of alerts such as ESCAPE RISK, LEG IRONS REQUIRED, SONOMA COUNTY INMATE, NO CLAYBANK, CLEARED FOR ALL WORK, and CLEARED FOR CLAYBANK.
- In - Out:** A section showing incarceration dates and contract information.

Summary

- ❑ The system permissions are now more granular with the addition of the inmate header permissions.
- ❑ Agencies can now control who and how much access is given to each line within the inmate header.
- ❑ This can help prevent internal classifications from being exposed to outside agencies.
