V2-16121	Incident Involved Party Facility Move	ATIMS has added the ability to queue incident involved party hearing based on an inmates current assigned facility instead of the originating facility where the incident was created. A new site option was added called 'INCIDENT DEFAULT INMATES FACILITY FOR HEARING' that will allow the default behavior to be set automatically or it can be done on demand by the user to toggle the queues based on incident facility vs inmate current assigned facility.	5/31/2023	8/24/2023	2.7.11
V2-16104	Housing Supply Missing in Pod Management	Housing Supply Management has been added to Pod Management.	5/26/2023	10/18/2023	2.6.70
V2-16074	Active Booking Basic Roster add Housing Column - Missed functionality	Determined to be missed functionality we are adding a Housing column to this report	5/18/2023	6/6/2023	2.6.59
V2-16065	PDP Payroll Part 1 Pay Inmate Transaction	ATIMS has added the ability to configure money funds to pay inmates from. Typically this will be used for inmates assigned to programs or works crew and agencies that offer payment to inmates for their work. Out of the box, there are no such funds and they must be configured. If a fund is configured to allow payment, then a new transaction called "PAY INMATE" will be made available with a new permission right 5008 ADD. The transaction would debit the pay fund and credit the session configuration for Program Classes, work crew and work furlough have been improved in the following ways.	5/17/2023	11/20/2023	2.7.26
V2-16057	Scheduler Sessions UX Part 2	<ol style="list-style-type: none"> 1. Color Code added to separate Recurring schedules vs Single Day (Do not Repeat) appointments. 2. Session column in grids were reworked to show sessions for the current week instead of overall recurring schedule. Allow future week scroll. 3. Single day appointments were added to the view of sessions in the viewers. 4. Anytime tracking was separated from sessions, both are allowed and one entry of either does not affect each other for validation. 5. At least one session requirement was removed from validation of any class, work crew or furlough entry. Now an entry is active and may or may not have a recurring schedule. However only active sessions for this week will now show, that means "expired" sessions are no longer needed and have been removed. 6. Quick entry of add single day appointments and cancel occurrence and inactivate were added to the viewers within the grid. Also within the drill down screen of class and work crew, the session were added to the display and allow the same management of sessions for quick access and viewing. 	5/16/2023	10/20/2023	2.7.32
V2-16031	Site Inmate Number in Identity Screen	Ability to display and manage site inmate number is now available in ADMIN->Global->Fields, under PERSON IDENTITY. When made visible, entry of inmate site number will be visible in the identity screen and with permission right 433 edit it	5/11/2023	8/25/2023	2.6.69

This is in addition to existing functionality that allows selection from rescheduled appointments and inmates with no housing.	1/23/2023	4/28/2023	2.5.91
V2-15388	Conviction Status Date Make Required Configurable	Conviction Status Date can now be configured to be required or not required based on entry of conviction status. In Admin, use system lookup to set flag 10 to make conviction status date required, else point forward the conviction status date will	1/23/2023	4/26/2023	2.5.88
V2CS-2438	CLONE - No ability to see what criteria you used in search	The search modules will now show the search filters above the search result grid.	12/23/2022	8/31/2023	2.7.11
V2CS-2392	CLONE - Requested New Quad Log Functionality	ATIMS has added the ability to allow for housing group logs. By turning on a new site option 'HOUSING GROUP LOG' = ON, the system will show a new button and filter in the viewer for a housing group note. In addition the ability to relabel 'Housing Group' was also added in site labels that clients can rename the display, for example 'QUAD' or 'WING'	12/8/2022	3/17/2023	2.6.32
V2-14799	Facility Transfer In Inmate File Housing	ATIMS has added ability to transfer an inmate within inmate file.	12/7/2022	5/26/2023	2.6.58
V2-14746	JSO RMS Issues and UX Modification	ATIMS added an option to allow secondary Prebook to be applied to active inmates. Turning on the site option will make an active inmate selectable during identity at intake and allow for a supplemental to be added from the Prebook data.	11/30/2022	5/30/2023	2.5.71
V2-14651	Out Time Enhancement	ATIMS will create new settings in Admin that will be used to flag a location as an "Out time area". Configuration by the client will be required prior to use. Examples of locations that may be flagged: YARD, RECREATION ROOM, DAYROOM, etc. Any location could potentially be flagged. Once flagged ATIMS will offer setting for how long an inmates receives offered out time for that location. ATIMS will also offer a setting for out time category which will be used to group locations. In the inmate file -> tracking screen, ATIMS will add display of "Weekly Time Out" which will sum all track records for a week and provide a view of the sum broken up actual and offered time for each category and overall total. ATIMS will provide a drill down of the tracking records to justify the totals and a summary of a day by day breakdown view. ATIMS will also add a new viewer in Pod Management called "Weekly Time Out" to show the Pod officer in batch style, all the inmate with their weekly out time totals. This will allow the Pod officer to make determination if any inmate is not meeting their weekly out time offering and offer a selection for batch tracking.	11/16/2022	6/26/2023	2.5.88
V2-14546	Multiple Bail Enhancement	Bail entry and posting bail has been modified to allow an option for multiple entries of bail. New flags we created to configure bail type behavior. Posting of bail was modified to break apart bond payment versus cash payment and allow for selection of the bail option. Clients must configure a new site option called BAIL MULTIPLE ENTRY and configure the bail type lookups to take advantage of these new features.	10/28/2022	12/14/2023	2.8.15
V2-14525	DPIL Photo Lineup V1 to V2 Conversion	ATIMS has add functionality for photo search and photo lineup within the search module. Clients can now make 6 pack or 8 pack lineups based on characteristics criteria and save witness identification position.	10/24/2022	11/9/2023	2.8.11
V2-13658	Schedular Sessions UX	The entry side of session scheduling for appointments, work crew, work furlough and program classes was modified for ease of use. Effectively, the viewing of session and the entry of data were split and now the viewing of the session is visible and the entry is within a dialog.	5/18/2022	9/19/2023	2.7.32
V2-13657	Schedular Next Day (+1 day) Enhancement	ATIMS has expended appointment functionality to allow for next day overlap. By setting a time that is less then the start time, the solution will no longer prevent the save validation, but allow the appointment to go through with a "+1 day" thru	5/18/2022	5/30/2023	2.6.53

ATIMS Release Notes

V2-13569	Custom Reports UI in ADMIN	ATIMS has created a GUI to allow the creation of client custom reports. Clients will need to be trained in JS reports and have access to ATIMS database to build stored procedures. The new GUI will allow to define the report, category, description, link to the JS report server and call out to the SP representing the report.	5/2/2022	1/16/2024	2.5.21
V2-12485	Viewer Max Records and Show Incidents	This enhancement will remove the 1 week filter used in the viewers and replace them with a max records to be returned per category thereby replacing the logic to perform a count first and validating the count prior to returning the record set. In addition, the viewer will be expanded to include searching and filtering of Incident data.	11/17/2021	4/12/2023	2.5.28
