

| Issue key | Summary | Release Note | Created | Updated | In build |
|-----------|--|--|-----------|-----------|----------|
| V2-16692 | Classify > Class File > File changes to view FLAG CREATE and FLAG INACTIVATE | This change will provide Classification specific users the ability to view flag history upon entry to inmate's Class File. | 7/25/2023 | 7/25/2023 | 2.7.8 |
| V2-16618 | Program Class Restrict by Housing Enhancement | ATIMS has added the ability to restrict program classes by inmate's housing. | 7/12/2023 | 7/26/2023 | |
| V2CS-3098 | CLONE - Unable to import null value into Middle Name during Intake | For the Prebook validation workflow step, the system will now allow a blank value to be imported for middle name. | 7/10/2023 | 7/20/2023 | 2.6.78 |
| V2-16391 | Incident, Incident-Summary Report Change/Updating to Incident Detail History | Update incident report summary to incident detail history, as well as adding searchable narrative add-on, and overall clean up of this report viewer. | 6/28/2023 | 7/24/2023 | 2.7.8 |
| V2-16243 | Money Pay Inmate Transaction for PDP Payroll | ATIMS has added the ability to pay inmates. Typically payments come from programs or work crew based on attendance. Configuration in ADMIN for pay inmate fund must be done prior to seeing this ability. Pay Inmate transaction will require a new permission right for users. | 6/21/2023 | 7/25/2023 | |
| V2-16230 | ACS - Alternative Corrections Application History (NEW SYSTEM REPORT) | This report is intended to provide clients a report that will pull data representing historical Application Status/Dispositions. This report will allow clients to report on those approved for the program and those denied over time. Currently we only offer this information from an individual inmate file view but not for an Overall view of the ACS programs offered. | 6/20/2023 | 7/18/2023 | 2.7.4 |
| V2-16229 | Weekender UX in ACS | ATIMS has added capability in ACS to support a weekender program. A program must be configured in ADMIN to set a weekender. Enrollment and works the same as a site managed ACS program. New queues were added in Intake and Release for weekenders. During a weekend stay the inmate is transferred to the main facility and then transferred back to a home stay facility for a weekend. Attendance will be tracked and once attendance is met, the inmate is released. | 6/20/2023 | 7/26/2023 | |
| V2CS-3041 | Grievance Change Order SLO | The grievance disposition stamping of personnel and date time have been made into user enterable fields to allow for back dating in case clerks are used data entry. Both the enterable values and the stamp are saved now and are displayed in the UI and the grievance detail report. | 6/13/2023 | 7/25/2023 | 2.7.7 |
| V2-16131 | Inmate Selector Search Type for Exact Match | ATIMS has added the ability to complete an "Exact Match" and "Starts With Search" for the inmate selector. This feature is a user preference and will save and remember the last state. | 6/1/2023 | 7/13/2023 | 2.6.74 |
| V2CS-2998 | CLONE - No ability in Admin to not display Condition of clearance Flag section | In Admin > Global > Field > Manage - Booking Details - ATIMS has added Condition of Clearance Flag settings allowing users to hide the field if necessary. | 6/1/2023 | 7/13/2023 | 2.6.69 |
| V2-16121 | Incident Involved Party Facility Move | ATIMS has added the ability to queue incident involved party hearing based on an inmates current assigned facility instead of the originating facility where the incident was created. A new site option was added called 'INCIDENT DEFAULT INMATES FACILITY FOR HEARING' that will allow the default behavior to be set automatically or it can be done on demand by the user to toggle the queues based on incident facility vs inmate current assigned facility. | 5/31/2023 | 7/24/2023 | 2.7.7 |
| V2-16104 | Housing Supply Missing in Pod Management | Housing Supply Management has been added to Pod Management. | 5/26/2023 | 6/23/2023 | 2.6.70 |
| V2-16074 | Active Booking Basic Roster add Housing Column - Missed | Determined to be missed functionality we are adding a Housing column to this report | 5/18/2023 | 6/6/2023 | 2.6.59 |
| V2-16065 | PDP Payroll Part 1 Pay Inmate Transaction | ATIMS has added the ability to configure money funds to pay inmates from. Typically this will be used for inmates assigned to programs or works crew and agencies that offer payment to inmates for their work. Out of the box, there are no such funds and they must be configured. If a fund is configured to allow payment, then a new transaction called "PAY INMATE" will be made available with a new permission right 5008 ADD. The transaction would debit the pay fund and credit the inmate. | 5/17/2023 | 7/26/2023 | |

| Issue key | Summary | Release Note | Created | Updated | In build |
|-----------|--|---|-----------|-----------|----------|
| V2-16057 | Scheduler Sessions UX Part 2 | <p>Session configuration for Program Classes, Work Crew and Work Furlough have been improved in the following ways:</p> <ol style="list-style-type: none"> 1. Color Code added to separate Recurring schedules vs Single Day (Do not Repeat) appointments. 2. Session column in grids were reworked to show sessions for the current week instead of overall recurring schedule. Allow future week scroll. 3. Single day appointments were added to the view of sessions in the viewers. 4. Anytime tracking was separated from sessions, both are allowed and one entry of either does not affect each other for validation. 5. At least one session requirement was removed from validation of any class, work crew or furlough entry. Now an entry is active and may or may not have a recurring schedule. However only active sessions for this week will now show, that means "expired" sessions are no longer needed and have been removed. 6. Quick entry of add single day appointments and cancel occurrence and inactivate were added to the viewers within the grid. Also within the drill down screen of class and work crew, the session were added to the display and allow the same management of sessions for quick access and viewing. | 5/16/2023 | 7/25/2023 | |
| V2-16031 | Site Inmate Number in Identity Screen | Ability to display and manage site inmate number is now available in ADMIN->Global->Fields, under PERSON IDENTITY. When made visible, entry of inmate site number will be visible in the identity screen and with permission right 433 edit it will be editable. | 5/11/2023 | 7/24/2023 | 2.6.69 |
| V2-16028 | Tracking History Vertical Scroll Issues | ATIMS has modified the tracking history into a popup dialog for easier viewing. | 5/10/2023 | 6/27/2023 | 2.6.69 |
| V2-16027 | Appointment Staging Report Small UX | Appointment Staging Report was change to include a filter for court only. In addition the court filter was change to have a multi-selection. | 5/10/2023 | 7/17/2023 | 2.7.6 |
| V2-16026 | Console Events Add Inmate Selector Filter | ATIMS has added the ability to filter the console appointment event list by inmate. This will allow users to quickly identify which row they are looking for in the long list of event groupings. | 5/10/2023 | 7/11/2023 | 2.6.69 |
| V2-16017 | Problem Queue UX Remove All and Add Links | ATIMS has removed the ALL BOOKING and ALL CASES in the examine queue as well as added links in the EXAMINE BOOKING to allow for quick access to resolve the issue. An information icon "i" was added to explain each queue. | 5/8/2023 | 7/24/2023 | 2.7.8 |
| V2-16016 | PDP YYMMDD Interval - Minimum sentence | <p>ATIMS has added a sentence interval for Year, Month, Day. By Entering this interval the equivalent days would be calculated based on the start date. The conversion to days can accommodate true calendar calculation or a 30 day/360 day year setting.</p> <p>In addition, ATIMS has added the ability to enter a "Minimum" sentence. This can be used for clients that do not preload sentence credits. Hence an indeterminant sentence will be created that must be released by the regular calculation but the client may discretionally clear the case earlier but not before the minimum sentence.</p> | 5/8/2023 | 7/26/2023 | |
| V2-16010 | Personal Inventory Bin Listing | ATIMS has added a new report and module called Bin Listing which is similar to the bin viewer but allow for a report style listing of each property bin. This can be used for bin verification to reconcile what is the computer vs. what is in the bins. | 5/5/2023 | 7/25/2023 | |
| V2CS-2893 | CLONE - Does No Keeper display somewhere on the inmate header? | The inmate header will now display No Keeper status. | 5/5/2023 | 5/23/2023 | 2.6.54 |
| V2-15999 | Headcount Add Inmate Adjustments | ATIMS headcount has been redesigned to reflect adjustments in the headcount. The new approach will track accounted for inmates and subtract them from the comparison to clear count. Additionally inmates that are checkout out, but found in the pod will reflect as adjustments. The ability to add inmates to the count in different locations has also been added, this will be treated as adjustment as well. With this new approach to reflect adjustments, the operational staff during count clearing should have better visibility to count discrepancies and the counts for adjustments will reflect in the comparison to drive the color code to clear count to green. | 5/4/2023 | 7/7/2023 | 2.7.3 |

| Issue key | Summary | Release Note | Created | Updated | In build |
|-----------|--|---|-----------|-----------|----------|
| V2CS-2875 | CLONE - Facility -> Pod Management -> Safety Check / Bed Note | The ability to view the details of a safety check has been added to the Pod Management > Viewer module. In the Type column, Safety Check is now a hyperlink that displays a view-only Safety Check Entry pop-up window where a summary of the safety check is displayed. | 5/4/2023 | 5/23/2023 | 2.6.54 |
| V2-15980 | Professional Visitor Inmate List | ATIMS has added the ability to create an inmate visit list for a professional visit registration. By default a new step 5 called "Professional Visit Inmate List" was added which will allow adding inmate and their visit registrations. A new visitor pass was created for a multi inmate visit so that only 1 print is needed for the visitor. | 5/1/2023 | 7/26/2023 | |
| V2-15967 | Active Inmate Basic Roster - Add Scheduled Release Date Column | A new filter was added to the "Active Inmate Basic Roster" Report To hide the overall schedule release date. | 4/26/2023 | 5/3/2023 | 2.6.51 |
| V2CS-2844 | CLONE - No way to see Contact Name when editing/modifying during Intake Workflow | When editing a contact's residential address, business address, or characteristics, the contacts full name and DOB will display at the top of the screen within these modules. | 4/24/2023 | 5/10/2023 | 2.6.52 |
| V2CS-2843 | CLONE - Monitor - Special Handling | In the Inmate Removal Entry pop-up window of Special Handling, the Reason drop down has been mapped to the Admin lookup titled "WHOS IN CUSTODY REMOVE REASON". Also, A pop-up window has been added when setting a Special Handling row to inactive, allowing users to enter a reason for inactivation. This reason drop down is mapped to the Admin lookup titled "WHOS IN CUSTODY REMOVE DELETE". | 4/24/2023 | 5/10/2023 | 2.6.51 |
| V2-15956 | Send To Livescan Flagging | ATIMS has added tracking of sent to live-scan flagging. After case are sent, a new color coded column was added to show the sent information and will no longer default the case to send. This way when supplemental cases are added after booking is complete, only the cases not sent will be checked for sending. | 4/24/2023 | 7/17/2023 | 2.6.58 |
| V2-15942 | Special Handling > Set to Inactive | Set to inactive reason has entry and lookup have been added for special handling (whos in custody) | 4/21/2023 | 7/3/2023 | 2.6.53 |
| V2CS-2836 | CLONE - Requests -> Request Status Display Bugs | The Request Status module has been updated with time interval chips and color coding. | 4/19/2023 | 5/10/2023 | 2.6.51 |
| V2CS-2835 | CLONE - Issues with Requests > Search Requests | Search Requests module has been redesigned. | 4/19/2023 | 5/11/2023 | 2.6.51 |
| V2-15921 | Set Inactive Reason for Keep Septs and Void Post Bail Reason | Keep Separate Inactivate Reason and note have been added upon inactivating an inmate keep separate record. <input type="checkbox"/> | 4/14/2023 | 6/2/2023 | 2.6.57 |
| V2-15884 | Purge Reference - Attachments and Forms | ATIMS has add the ability to Purge References for Attachments and Forms | 4/5/2023 | 7/24/2023 | 2.7.6 |
| V2CS-2784 | CLONE - Add Appointment Note to Tracking Schedule detail | Appointment Details, Appointment Notes, and Court Case columns have been added to the Tracking Schedule module and are visible after a user selects a row. They will need to be made visible via the settings cog. | 4/3/2023 | 5/11/2023 | 2.6.51 |
| V2-15840 | Set No Bail Upon Conviction Enhancement | ATIMS added flag 11 to Conviction Status Lookup that clients can set to automatically clear out bail upon save of conviction during sentencing screen. This feature is a more granular approach to do the same functionality as the existing site option for SET NO BAIL AFTER SENTENCE. However with the lookup, clients can configure a conviction that carries no sentence to clear bail, for example Conviction Status = SENTENCE TO STATE PRISON | 3/24/2023 | 4/27/2023 | 2.6.46 |
| V2CS-2748 | CLONE - Should completing a Move Booking add an AKA? | An AKA alias will be added to the inmate that is receiving a booking move of the person that the booking is coming from if they don't already have the same name or the AKA doesn't already exist. | 3/24/2023 | 5/11/2023 | 2.6.51 |
| V2-15792 | Tracking Appointment Conflict Issue | ATIMS has added an option to set the appointment conflict check to be configurable based on exact time or a buffer of X minutes. The default will remain to conflict the entire day of appointments but clients can now, set the conflict to only overlap exact times or with a buffer. | 3/16/2023 | 3/21/2023 | 2.6.40 |
| V2-15789 | Gang Keep Separate Display - Consolidate in Header | Gang to Inmate display in the inmate header alert section was been modified to group the inmates to a single line display with a popup to show the inmates. | 3/16/2023 | 6/22/2023 | 2.6.49 |
| V2CS-2659 | Visitor Assignment in Inmate File | ATIMS has added ability to manage visitors in inmate file. Please set proper access permission rights in admin to Inmate file -> Operations -> Assigned Visitors | 3/3/2023 | 5/24/2023 | 2.6.54 |

| V2-14746 | JSO RMS Issues and UX Modification | ATIMS added an option to allow secondary Prebook to be applied to active inmates. Turning on the site option will make an active inmate selectable during identity at intake and allow for a supplemental to be added from the Prebook data. | 11/30/2022 | 5/30/2023 | 2.5.71 |
| V2-14718 | Viewer Max Records and Show Incidents_Error on page load_Pod management_Operations_Viewer | This enhancement will remove the 1 week filter used in the viewers and replace them with a max records to be returned per category thereby replacing the logic to perform a count first and validating the count prior to returning the record set, In addition, the viewer will be expanded to include searching and filtering of Incident | 11/29/2022 | 3/20/2023 | |

| Issue key | Summary | Release Note | Created | Updated | In build |
|-----------|--|--|------------|------------|----------|
| V2-14651 | Out Time Enhancement | <p>ATIMS will create new settings in ADMIN that will be used to flag a location as "Out time"™. Configuration by the client will be required prior to use. □</p> <p>Examples of locations that may be flagged: YARD, RECREATION ROOM, DAYROOM, etc. Any location could potentially be flagged. □</p> <p>Once flagged ATIMS will offer setting for how long an inmates receives offered out time for that location. ATIMS will also offer a setting for out time category which will be used to group locations. In the inmate file -> tracking screen, ATIMS will add display of "Weekly Time Out" which will sum all track records for a week and provide a view of the sum broken up actual and offered time for each category and overall total. ATIMS will provide a drill down of the tracking records to justify the totals and a summary of a day by day breakdown view. □</p> <p>□</p> <p>ATIMS will also add a new viewer in Pod Management called "Weekly Time Out" to show the Pod officer in batch style, all the inmate with their weekly out time totals. This will allow the Pod officer to make determination if any inmate is not meeting their weekly out time offering and offer a selection for batch tracking. □</p> | 11/16/2022 | 6/26/2023 | 2.5.88 |
| V2-14546 | Multiple Bail Enhancement | Bail entry and posting bail has been modified to allow an option for multiple entries of bail. New flags were created to configure bail type behavior. Posting of bail was modified to break apart bond payment versus cash payment and allow for selection of the bail option. Clients must configure a new site option called BAIL MULTIPLE ENTRY and configure the bail type lookups to take advantage of these new features. | 10/28/2022 | 7/24/2023 | 2.6.54 |
| V2-14525 | DPIL Photo Lineup V1 to V2 Conversion | ATIMS has add functionality for photo search and photo lineup within the search module. Clients can now make 6 pack or 8 pack lineups based on characteristics criteria and save witness identification position. | 10/24/2022 | 7/26/2023 | |
| V2-14373 | Overhead Display Enhancement_Char column display only Height and weight | ATIMS has added an overhead module which is designed for a projector or large screen TV and displays various queues that can be configured in ADMIN. The major workflows as well as location and housing data can all be configured to display. Once the overhead is started, the queues automatically scroll by user defined time intervals. When this module is open the system will turn off check for inactivity timeouts. | 9/21/2022 | 9/27/2022 | 2.5.35 |
| V2-14362 | Overhead Display Enhancement_Admin_Sysytem_Overhead display_Unable to select few Column Name with type aheads | ATIMS has added an overhead module which is designed for a projector or large screen TV and displays various queues that can be configured in ADMIN. The major workflows as well as location and housing data can all be configured to display. Once the overhead is started, the queues automatically scroll by user defined time intervals. When this module is open the system will turn off check for inactivity timeouts. | 9/20/2022 | 9/28/2022 | 2.5.35 |
| V2-14359 | Overhead Display Enhancement_Elapsed field Line 2 _workflow_do not display "Since prebook complete" | ATIMS has added an overhead module which is designed for a projector or large screen TV and displays various queues that can be configured in ADMIN. The major workflows as well as location and housing data can all be configured to display. Once the overhead is started, the queues automatically scroll by user defined time intervals. When this module is open the system will turn off check for inactivity timeouts. | 9/20/2022 | 10/14/2022 | 2.5.35 |
| V2-14338 | Overhead Display Enhancement_When setting default overhead display in workstation setting no records are laoding. | ATIMS has added an overhead module which is designed for a projector or large screen TV and displays various queues that can be configured in ADMIN. The major workflows as well as location and housing data can all be configured to display. Once the overhead is started, the queues automatically scroll by user defined time intervals. When this module is open the system will turn off check for inactivity timeouts. | 9/16/2022 | 9/16/2022 | 2.5.30 |
| V2-14199 | Alert Flag Require and Expire Mandatory_Alert order disabled for most flags and expiration incorrectly added to PREA flags | ATIMS has added to new settings in ADMIN to allow users to make the the Alert note and Alert expiration required when selected. In addition, the UI was modified for cleaner look and usability. | 8/25/2022 | 10/20/2022 | 2.5.39 |

| V2-13941 | Professional Visitor Search Replace with Master and Add Inmate Number Search | Professional visitors registration has been reworked to use the existing master name search instead of prior professional search. In addition, the system will now offer the ability to place business address for professional visitors. | 7/13/2022 | 9/14/2022 | 2.5.27 |

| Issue key | Summary | Release Note | Created | Updated | In build |
|-----------|--|--|-----------|-----------|----------|
| V2-13821 | New Release - Booking Not Complete Warning | A warning message was added for attempting to release an inmate without booking complete. This feature that is used to remove a booking error will now show this message to prevent release of an actual person that needs to be completed. | 7/1/2022 | 9/8/2022 | 2.5.17 |
| V2-13763 | Inmate Supply V1 to V2 Conversion | ATIMS has added inmate supply that allows management of clothing size and tracking of supply items that are given to inmates such as clothing and linens. Additional online reports are provided to assist with the exchange process. | 6/21/2022 | 11/2/2022 | 2.5.27 |
| V2-13721 | CLONE - Contact UX Set Previous Upon Release | A new site option was added called SET CONTACTS TO PREVIOUS UPON RELEASE. By default it is OFF, when this is turned ON, the system will force all current contacts to be set to previous contacts upon release. | 6/9/2022 | 8/26/2022 | 2.5.18 |
| V2-13680 | Incident Flag Sub Data Entry Enhancement - Hennepin Change Order | ATIMS has added new functionality within the incident module to allow entry of more granular flag data pertaining to injury, contraband and Assaults. ADMIN configuration of incident flags and incident involved party flags are required (setting of lookup flags) before these new entry points are visible. In addition a new module called Loss of Day has been added to allow tracking of personnel injury that lead to loss of days. | 5/24/2022 | 2/3/2023 | 2.5.30 |
| V2-13658 | Schedular Sessions UX | The entry side of session scheduling for appointments, work crew, work furlough and program classes was modified for ease of use. Effectively, the viewing of session and the entry of data were split and now the viewing of the session is visible and the entry is within a dialog. | 5/18/2022 | 7/25/2023 | |
| V2-13657 | Schedular Next Day (+1 day) Enhancement | ATIMS has expended appointment functionality to allow for next day overlap. By setting a time that is less than the start time, the solution will no longer prevent the save validation, but allow the appointment to go through with a "+1 day" thru date. | 5/18/2022 | 5/30/2023 | 2.6.53 |
| V2-13607 | Force IP Address for Workstation Name | A New site option "FORCE IP ADDRESS FOR WORKSTATION NAME" has been added to allow an agency environment to bypass the workstation setting by forcing the IP address as the workstation name. This option will prevent the popup entry during login. Only use this option if your agency does not name computers and there are no conflicting IP addresses and no remote sessions where the IP address is reused. | 5/6/2022 | 6/7/2022 | 2.5.9 |
| V2-13577 | AKA Origin and Note Enhancement_Notes not displaying in multiple lines | A new entry for AKA name has been added to allow users to apply an AKA origin field. This field is a lookup and initially seeded with default values provided by ATIMS, clients can modify in ADMIN lookup as needed. For each AKA name the origin will specify how the AKA name got there or for what reason. In addition every AKA entry will also now have a note field to allow users to enter free form note about that AKA. The display in the system will show a new icon for the note and will append the origin if one exists at the end of the AKA name in | 5/4/2022 | 5/24/2022 | 2.5.5 |
| V2-13576 | Contact UX Set Previous Upon Release | A new site option was added called SET CONTACTS TO PREVIOUS UPON RELEASE. By default it is OFF, when this is turned ON, the system will force all current contacts to be set to previous contacts upon release. | 5/4/2022 | 6/9/2022 | 2.5.9 |
| V2-13569 | Custom Reports UI in ADMIN | ATIMS has created a GUI to allow the creation of client custom reports. Clients will need to be trained in JS reports and have access to ATIMS database to build stored procedures. The new GUI will allow to define the report, category, description, link to the JS report server and call out to the SP representing the report. | 5/2/2022 | 7/24/2023 | 2.5.21 |
| V2-13554 | Alert Flag Require and Expire Mandatory | ATIMS has added to new settings in ADMIN to allow users to make the Alert note and Alert expiration required when selected. In addition, the UI was modified for cleaner look and usability. | 4/25/2022 | 8/25/2022 | 2.5.22 |

| Issue key | Summary | Release Note | Created | Updated | In build |
|-----------|--|--|-----------|------------|----------|
| V2-13523 | Incident - Narrative Type - Administrative Review - Force Complete | <p>ATIMS has modified:</p> <ul style="list-style-type: none"> 1. The UI within the incident detail to place the submittal and review process within panels. 2. Added incident save history 3. Change review narratives UI to include panels 4. Added force complete process to complete incidents before hearing are complete. 5. Add new narrative type concept throughout to specify what kind of narrative is got added. 6. Added new concept of administrative review, allow a parallel to hearing compliance path for administrators to review incidents. New feature to set rules to force this review have been added to ATIMS admin. A new module called "Administrative Review" was also added for queueing pending and denied reviews. 7. New search modules were added for searing incident narrative and for searching historical administrative reviews. | 4/15/2022 | 11/21/2022 | |
| V2-13485 | Display Flag Assign Reason in Inmate Header | ATIMS has added the ability to show an alert flag assignment reason within the inmate header. Each alert flag can be configured in ADMIN to display this. By default the reason will not show. | 4/7/2022 | 7/6/2022 | 2.5.2 |
| V2-13451 | Overhead Display Enhancement | ATIMS has added an overhead module which is designed for a projector or large screen TV and displays various queues that can be configured in ADMIN. The major workflows as well as location and housing data can all be configured to display. Once the overhead is started, the queues automatically scroll by user defined time intervals. When this module is open the system will turn off check for inactivity timeouts. | 4/1/2022 | 9/21/2022 | 2.5.30 |
| V2CS-1692 | Email address is set as a required field for a pre-existing user when user details are modified. | <ul style="list-style-type: none"> 1) In Admin -> User> Personnel, choose a pre-existing AD user. 2) Modify to use default domain and save. 3) It should save successfully without asking for any email entry since it is not a required field. | 3/29/2022 | 4/27/2022 | |
| V2-13411 | Inmate File>Person>Contact-Manage Citizenship opening to Inmate and not Contact | This enhancement will introduce a new concept for "Current" contact. This is a point forward solution so all historical data will be considered as not current. Users will be allowed to set any contact as current, hence placing them on top a list and differentiating by color. In addition a contact list and note will be added at the inmate level so inmate that do not provide a list can be tracked and as an option the note can be used for any purpose including soring contact information without the master name. | 3/23/2022 | 5/13/2022 | 2.5.2 |
| V2-13406 | Appointment Court Link to Historical Case | ATIMS has added the ability to see and assign historical cases to an appointment. | 3/22/2022 | 6/2/2022 | |
| V2-13351 | Person Descriptor UX | Descriptor NCIC codes have been updated and applied to this release. In addition an ADD button was added as well as chip filters to upon selection of body region. | 3/17/2022 | 9/27/2022 | 2.5.35 |
| V2-13244 | Assigned Groups View and Test User UX | ATIMS has added the ability to configure a test user in ADMIN. This will allow a non ADMIN user to replace their user groups assignments with another user's group assignment. | 3/2/2022 | 1/12/2023 | 2.5.42 |
| V2-13165 | Report Optimization Enhancement | System Reports Have been modified to include a Max Records count to prevent large large reports from executing. In addition, while the reports are rendering, new display message and processing status have been applied. | 2/22/2022 | 2/22/2022 | |
| V2CS-1589 | Property task menu and column sizing issues | | 2/18/2022 | 3/24/2022 | |
| V2-13070 | Console Auto Refresh-restart countdown when REFRESH button pushed | A new option has been added to allow the console to auto refresh. Client must turn on "CONSOLE AUTO REFRESH" in ADMIN->Global->Option and set an interval in minutes. Once turned o, the console will auto refresh automatically as the timer winds down to 0. | 2/14/2022 | 3/3/2022 | |
| V2-13068 | Alternative Inmate Booking-second charge on Supp case is not being consumed | Inmates that are active in a facility designated as Alternative Corrections (live at home programs) get booked. ATIMS has made software provisions to all prebooks of the inmates and they will be handled as ADD SUPPLMENTALS during intakes with the ability to perform a facility transfer during INTAKE CREATE. | 2/14/2022 | 2/25/2022 | |

| Issue key | Summary | Release Note | Created | Updated | In build |
|-----------|---|---|------------|------------|----------|
| V2-13053 | Alternative Inmate Getting Booked UX_Adding a supplemental allows user to BYPASS Medical, Identity and Review steps in prebook detail | Inmates that are active in a facility designated as Alternative Corrections (live at home programs) get booked. ATIMS has made software provisions to all prebooks of the inmates and they will be handled as ADD SUPPLMENTALS during intakes with the ability to perform a facility transfer during INTAKE CREATE. | 2/10/2022 | 2/17/2022 | |
| V2-13036 | Alternative Inmate Getting Booked UX_Prebook queue not refreshing data after creating Prebook for an ALT corections inmate in PBPC | Inmates that are active in a facility designated as Alternative Corrections (live at home programs) get booked. ATIMS has made software provisions to all prebooks of the inmates and they will be handled as ADD SUPPLMENTALS during intakes with the ability to perform a facility transfer during INTAKE CREATE. | 2/9/2022 | 2/25/2022 | |
| V2-13033 | Alternative Inmate Getting Booked-Inmate is not dropping off the Prebook queue | Inmates that are active in a facility designated as Alternative Corrections (live at home programs) get booked. ATIMS has made software provisions to all prebooks of the inmates and they will be handled as ADD SUPPLMENTALS during intakes with the ability to perform a facility transfer during INTAKE CREATE. | 2/9/2022 | 5/3/2022 | |
| V2-13031 | Alternative Inmate Getting Booked UX _Add supplemental and click cancel still add case in Assigned cases | Inmates that are active in a facility designated as Alternative Corrections (live at home programs) get booked. ATIMS has made software provisions to all prebooks of the inmates and they will be handled as ADD SUPPLMENTALS during intakes with the ability to perform a facility transfer during INTAKE CREATE. | 2/9/2022 | 5/6/2022 | 2.5.3 |
| V2-13011 | Different Results between Incident Search Types | Fixed issue where location was not returning consistent values between the various Incident Search screens | 2/4/2022 | 2/28/2022 | |
| V2-12933 | Special Classification Queue for Alerts | ATIMS has created the ability to allow agencies to flag alert flags to the classification queue. Alert flags can now be configured to have a day interval for the special classification queue. This will be helpful to override interval for other classifications when an inmate is flagged as Administrative Separation (or Segregation) or Protective Custody. These new special queues will force a review based on a shortened interval. Clients will need to configure Alert Flags in ADMIN for PERSON, INMATE, DIET or MEDICAL FLAGS (Flag 8 - Classification Special Queue) to be checked and set an interval for the days. All inmates flagged with that flag alert will show in the special queue. | 1/28/2022 | 6/8/2022 | 2.5.2 |
| V2-12835 | Alternative Inmate Getting Booked UX | Inmates that are active in a facility designated as Alternative Corrections (live at home programs) get booked. ATIMS has made software provisions to all prebooks of the inmates and they will be handled as ADD SUPPLMENTALS during intakes with the ability to perform a facility transfer during INTAKE CREATE. | 1/13/2022 | 3/22/2022 | |
| V2-12834 | All Records Master Name Search UX | New site option has been added to to default the master name search in PBPC to "Inactive Records" | 1/13/2022 | 2/7/2022 | |
| V2-12713 | PBPC Prebook Search UX Enhancement | PBPC Prebook Search module has been redesigned to include status and date filter requirements and allow for other various numbering searches. The results grid was changed to show in a full page and more columns of information. | 12/29/2021 | 1/25/2022 | |
| V2-12686 | Workstation Settings Additional UX | ATIMS has added the concept of workstation settings to ADMIN configuration. Upon entry into ATIMS, a new dialog will appear (once per user per workstation) to enter the computer name or number that matches a workstation list. Users with permission will also be allowed to create new workstations as they enter the system. Please work with your PM to import or create this list. | 12/22/2021 | 2/1/2022 | |
| V2CS-1483 | Charge # not displaying correctly with Sentence By Charge | Will correct the display of Charge # in the Sentence By Charge module | 12/20/2021 | 1/3/2022 | |
| V2-12590 | Purge Module | ATIMS have added the ability to expunge court ordered records. New permission rights 945 and 946 were added to allow personnel to view and print sealed record respectively within a new module called Records Inquiry. The print will follow the same format as the History Summary and allow staff to allow/disallow parts of the criminal history they wish to provide. | 12/6/2021 | 8/25/2022 | 2.5.20 |
| V2CS-1463 | CLONE - PREA Attestation Form | PREA Attestation form has been updated from Department to Office | 12/3/2021 | 12/16/2021 | |
| V2-12574 | Records Inquiry with Sealed Records | ATIMS have added a new Person Inquiry module used by records to search and print criminal history of an individual. The new module was built using the existing master name search and offers the ability to print based on what the user selects. | V2CS-1460 | Task in Property Inventory Queues UX Enhancement | □ | 11/29/2021 | 2/18/2022 | |

| Issue key | Summary | Release Note | Created | Updated | In build |
|-----------|--|--|------------|------------|----------|
| V2-12548 | AKA Origin and Note Enhancement | A new entry for AKA name has been added to allow users to apply an AKA origin field. This field is a lookup and initially seeded with default values provided by ATIMS, clients can modify in ADMIN lookup as needed. For each AKA name the origin will specify how the AKA name got there or for what reason. In addition every AKA entry will also now have a note field to allow users to enter free form note about that AKA. The display in the system will show a new icon for the note and will append the origin if one exists at the end of the AKA name in | 11/24/2021 | 5/4/2022 | 2.5.2 |
| V2-12547 | Console Auto Refresh Enhancement | A new option has been added to allow the console to auto refresh. Client must turn on "CONSOLE AUTO REFRESH" in ADMIN->Global->Option and set an interval in minutes. Once turned o, the console will auto refresh automatically as the timer winds down to 0. | 11/24/2021 | 2/14/2022 | |
| V2CS-1456 | Incorrect Display of Consecutive Sentence on Overall Sentence screen | Update the display of consecutive sentence on the Overall Sentence screen to display the correct case....will no longer use the Docket Number as part of hte display. | 11/22/2021 | 11/29/2021 | |
| V2-12511 | Color code for historical flag alerts | A new color code and legend was added in flag alerts to show historical alerts. These are alerts that are not ON but were at one point for this inmate. We will also add more lettering to help differentiate active vs non active alerts. | 11/19/2021 | 12/29/2021 | |
| V2-12485 | Viewer Max Records and Show Incidents | This enhancement will remove the 1 week filter used in the viewers and replace them with a max records to be returned per category thereby replacing the logic to perform a count first and validating the count prior to returning the record set, In addition, the viewer will be expanded to include searching and filtering of Incident | 11/17/2021 | 4/12/2023 | 2.5.28 |
| V2-12420 | Contact UX | This enhancement will introduce a new concept for "Current" contact. This is a point forward solution so all historical data will be considered as not current. Users will be allowed to set any contact as current, hence placing them on top a list and differentiating by color. In addition a contact list and note will be added at the inmate level so inmate that do not provide a list can be tracked and as an option the note can be used for any purpose including soring contact information without the master name. | 11/9/2021 | 3/23/2022 | |
| V2-6397 | PBPC settings and default and permission cleanup | PBPC active queue has been modified to lock down arresting agencies to view or modify other agencies pre-book data. Permission right 603 ACCESS should be set to allow user access to all agencies. The UI has been changed as well to move the groupings to the top of the content area to allow for a wider display of the grid. | 3/3/2020 | 2/3/2022 | |
